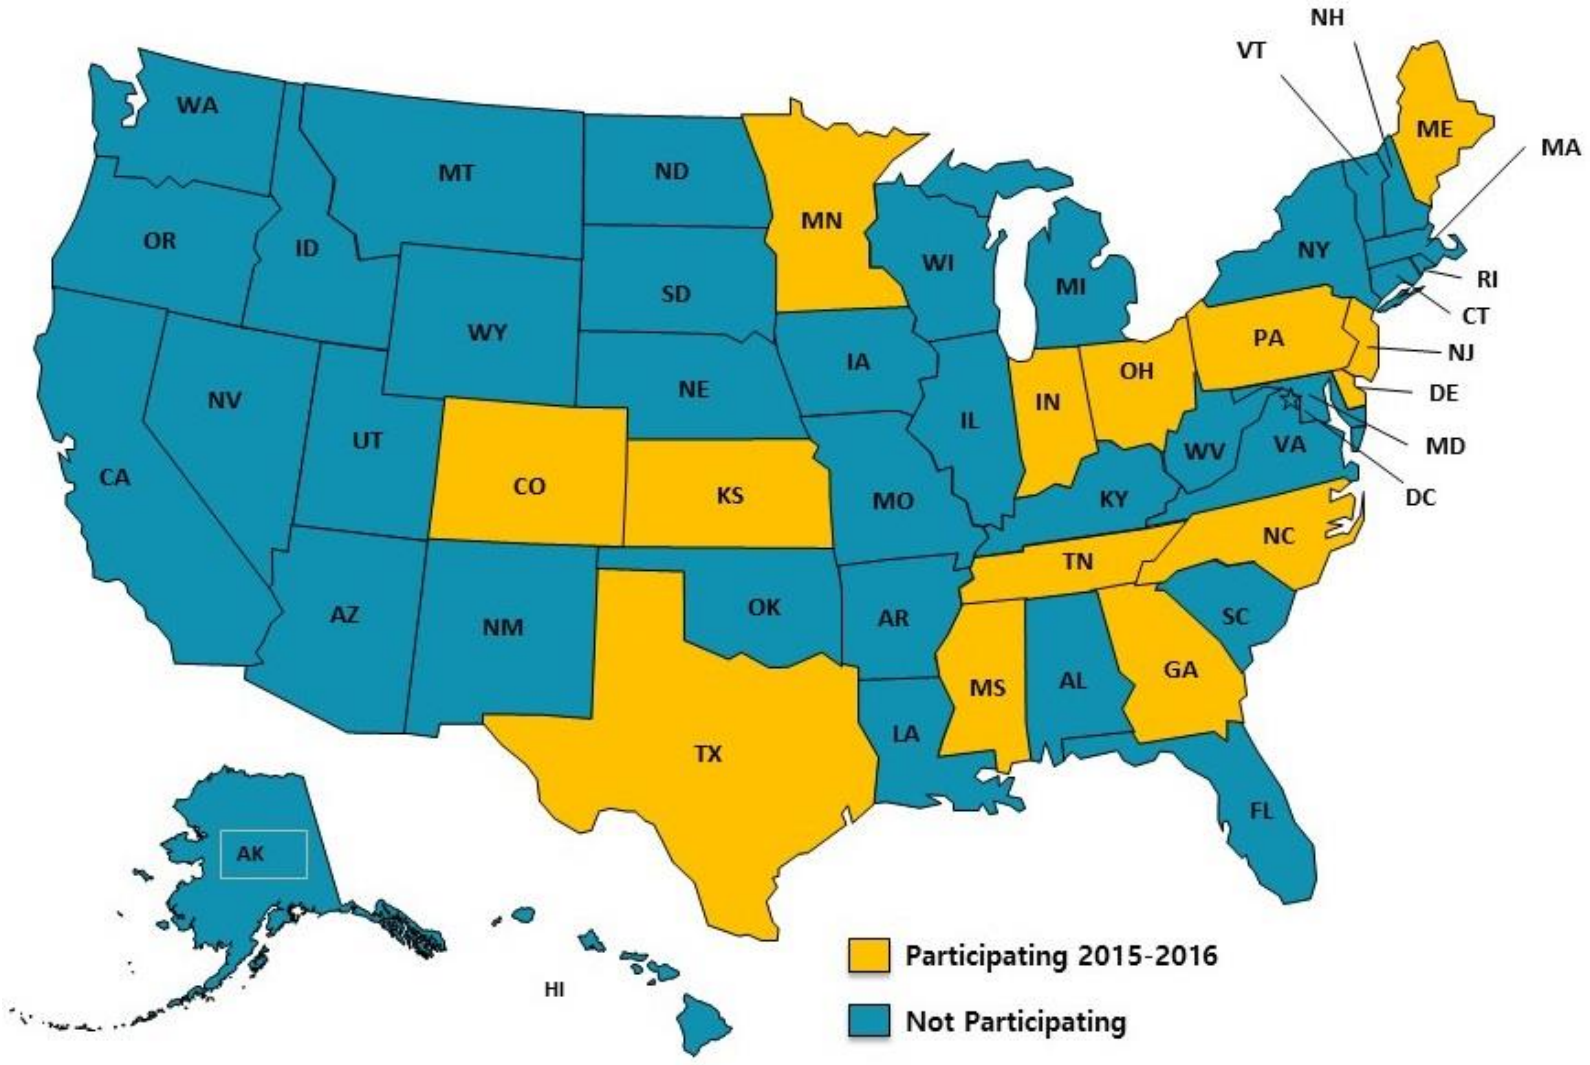
Human Services Research Institute

State Participation 2015-2016



What is NCI-AD?

Participating state agencies collect data to measure the performance and outcomes of their aging and disability services.

The Indicators are designed to be:

- Reflective of the mission, vision, and values of the field
- Measurable
- Practical to implement
- Reliable and valid
- Sensitive to changes in the system
- Representative of issues in the state
- Reflective of outcomes that were important to all individuals regardless of level of disability or residential setting

NCI-AD

Purpose

- Gather feedback directly from service recipients
- Assesses quality of life, service satisfaction, and outcomes of service recipients
- Supports state Aging, Disability, and Medicaid Agencies interested in measuring the performance of their state LTSS systems
- Assists states to improve the quality of services and supports provided to individuals

NCI-AD

Measures

Consumer Outcomes:

- Community Participation
- Choice and Decision-making
- Relationships
- Satisfaction
- Service and Care Coordination
- Access
- Self-Direction of Care
- Work/Employment
- Rights and Respect
- Health, Safety, and Wellness
- Everyday Living and Affordability
- Planning for the Future
- Functional Competence

NCI-AD

Colorado's Process…..

- Contracted with Vital Research to recruit & train interviewers to conduct surveys and collect individual survey data.
- Provided two day in-person training to all interviewers and relevant team members (HSRI, NASUAD and Vital Research, HCPF and CDHS collaboration).
- All surveys were conducted face-to-face at the client's preferred location.
- All data was analyzed and submitted to HSRI by Vital Research.
- State-specific reports were produced by HSRI and delivered to Colorado in March 2016. Colorado was part of a shortened-data cycle.

Colorado's Sample

Completed Interview Targets by Waiver Program

Name of Program	Number of Interviews to Complete
Elderly Blind Disabled (EBD)	160
Brain Injury (BI)	4
Frail Elderly (FE)	150
Older Americans Act (OAA)	86

NCI-AD

Medicaid Population Highlights-

"**Are you able to do things you enjoy outside of your home when and with whom you want to?"** The Colorado average was 55% and the NCI-AD national average was 62%. **(-)**
"Can you see or talk to your friends and family when you want to?" The Colorado average was 88% and NCI-AD national average was 87%. **(+/-)**
"***How often do you feel lonely, sad or depressed?"*** The Colorado average was 54% and NCI-AD national average was 53%. **(+/-)**
"Do you have a paying job in the community?" The Colorado average was 1% and the NCI-AD national average was 2%. **(+/-)**
"Do you feel that the people who are paid to help you treat you with respect?" The Colorado average was 95% and the NCI-AD national average was 93%. **(+)**
"Do the services you receive meet your needs and goals?" The Colorado average was 63% and the NCI-AD national average was 62%. **(+/-)**
"Can you choose or change what kind of services you get and determine how often and when you get them?" The Colorado average was 70% and NCI-AD national average was 65%. **(+)**

NCI-AD

Evaluation of NCI-AD

- The main limitations with the study are (1) the uncertainty over how well the sample represents the population, (2) the small sample size, (3) the high margin of error, (4) lack of comparison among states, across time, or among programs within Colorado, and (5) measurement errors.
